

Lin Sims' List of FrameMaker Utilities and Plugins

This list was compiled for my personal reference, and it may contain inaccurate or outdated information. It's updated whenever I feel like it. Check the developer's website for complete and current product information. Note that the inclusion or exclusion of any product from this list **does not** represent either an endorsement or a condemnation. If your product is on this list but the information is incorrect, let me know and I'll fix it for the next release (which will happen whenever I get around to it). If your product isn't on the list and you'd like it to be, send me the information for each column and I'll add it for the next release (which will happen whenever I get around to it).

I do not consider this to be a copyrighted document, since I did not develop the information, I just compiled it. In many cases, descriptions have been copied directly from the creator's web site.

Table 1 Windows Utilities for FrameMaker (Sheet 1 of 16)

Name	Type/Cost	OS	FM Version	Source	Description
Alert Tools	Plugin/Shareware— \$5 per seat, \$50 per site, \$500 worldwide Nags until you pay for it	Win, Mac, Solaris	5.5.x, 6.0, 7.0 (no 7.0 for Solaris)	Silicon Prairie http://www.siliconprairiesoftware.com/	Alert Tools provides the ability to display an alert message when a FrameMaker document is opened. These alerts can be used to provide reminders to writers when they edit documents, or to alert writers that specific documents shouldn't be updated.
Archive Book	Plugin/Shareware— \$20	Win	5.5.x, 6.0, 7.0	Bruce Foster Plugins http://www.frameexpert.com/plugins/brucefoster/index.htm	Archive is a shareware plugin for FrameMaker that copies a book to an archive directory and gathers all documents, referenced graphics, and text insets for that book into the archive directory. All references in the archived book are relative and point to documents, graphics, and text insets under the archive directory. NOTE: New version (2.0) released April 2003.
AutoText	Plugin/Shareware— \$10 per seat, \$100 per site, \$1,000 worldwide Nags until you pay for it	Win, Mac, Solaris	5.5.x, 6.0, 7.0 (no 7.0 for Solaris)	Silicon Prairie http://www.siliconprairiesoftware.com/	Auto-Text is a FrameMaker plug-in that allows you to define a set of text or graphic items and easily insert them into any FrameMaker document.

Table 1 Windows Utilities for FrameMaker (Sheet 2 of 16)

Name	Type/Cost	OS	FM Version	Source	Description
Book2PDF	Plugin/Freeware	Win	5.5.6, 6.0	Mekon http://www.mekon.co.uk/software/plugins.htm	<ul style="list-style-type: none"> List generation for FrameMaker 5.5.6—This free Mekon plugin enables Adobe FrameMaker to successfully generate lists in the form of a Table of Contents from a FrameMaker book. Printing to PDF for FrameMaker versions 5.5.6 and 6.0—When a book is printing to PDF as individual files, any cross-references or links going to other folders will be lost. This free Mekon plugin allows you to print directly to PDF without losing any of the links.
BookInfo	Plugin/Shareware—\$10	Win	5.5.x, 6.0, 7.0	Bruce Foster Plugins http://www.frameexpert.com/plugins/brucefoster/index.htm	BookInfo is a shareware (\$10) plugin for FrameMaker that counts the total number of words, pages, and anchored frames in all documents in a book.
Book-level Conditional Text	Plugin/Freeware	Win	5.5.6	ElectroPubs http://www.electropubs.com/downloads.htm	<p>This utility displays the familiar Conditional Text dialog box on a .BK (book) file's menu. Change the Show/Hide settings, and the settings of all files in the book are automatically updated.</p> <p>French Interface.</p>
BookLooker	Plugin/Freeware	Win	5.5.6, 6.0, 7.0	Cudspan http://www.telecable.es/personales/cud/cssIndex.htm	<p>Part of Cudspan Tools. Searches across books and performs other book-wide actions.</p> <ul style="list-style-type: none"> Locks and unlocks files Turns changebars on and off and clears changebars in entire book Bookwide finds of strings, marker text, marker types, cross-references, unresolved cross-references, and document- and book-level hunt for paragraph overrides; creates hypertext linked document of results

Table 1 Windows Utilities for FrameMaker (Sheet 3 of 16)

Name	Type/Cost	OS	FM Version	Source	Description
BookMark Controller	Plugin/Retail—\$80; volume discount available	Win	5.5.6, 6.0, 7.0	MicroType http://www.microtype.com/	<ul style="list-style-type: none"> • CollapseBookmarks—automatically collapses Acrobat bookmarks. • ParaNumOut—automatically removes the paragraph numbers from bookmarks (carried over from source paragraphs). • MergeBookmarks—merges a bookmark, such as a chapter number, with the following one. • ExtractFigureBookmarks and ExtractTableBookmarks—collate bookmarks for figures and tables and place them either at the beginning or at the end of the bookmark list, under a corresponding heading, initially expanded or collapsed as needed. • FixSpecialCharsInBmk—handles various special spaces and hyphens in bookmark text, so that they are displayed meaningfully. • ReOrderCustomBookmarks—forces your custom bookmarks to be at the top or bottom of the list of bookmarks. • BookmarkStylerByText and BookmarkStylerByLevel—enable you to define bookmark color and font properties (Acrobat 5) so that they are automatically created in the PDF, based on bookmark text and/or level. • ChangeBmkStart—enables you to specify up to 10 from-to replacements, so that repetitive text can be reduced to an abbreviation (or eliminated entirely). • RemoveRedundantBmkStart enables you to specify up to 10 strings of redundant text that will be removed from the beginning of bookmarks, so that bookmarks will have a unique beginning and be easier to identify.
BookPageCount	Plugin/Retail—\$20/user, \$200/site	Win		Carmen Publishing http://www.frameexpert.com/plugins/index.htm	BookPageCount calculates the total number of pages in your book and puts the number in a user variable called Book Page Count. You can use this variable anywhere in your documents; for example, in footers to show the total page count of the book.

Table 1 Windows Utilities for FrameMaker (Sheet 4 of 16)

Name	Type/Cost	OS	FM Version	Source	Description
Clean Import	Plugin/Shareware— \$15/single, \$50/site	Win 9x	5.5.6, 6.0	ElectroPubs http://www.electropubs.com/downloads.htm	<p>The Clean Import plug-in deletes all paragraph and character tag names, table definitions, cross-reference formats, conditional text tags, master pages, reference pages from the current document, then allows you to select formats from a selected template.</p> <p>Can be used on multiple files simultaneously, from FrameMaker's Book window. For example, if all the Appendices in your book use the same template, select all Appendix files then choose EZTools > CleanImport. The utility "remembers" the most recently used template directory.</p> <p>NOTE: Any text marked with a condition is deleted without warning when the conditional text tag is deleted. To avoid this potential issue, conditional text tags are no longer deleted from the source document before importing the formats from the template.</p> <p>NOTE: Used to be freeware. Is now shareware.</p>
CudLog	Plugin/Freeware	Win	5.5.6, 6.0, 7.0	Cudspan http://www.telecable.es/personales/cud/cssIndex.htm	Part of Cudspan Tools. A logging utility that is used by many of these other plugins.
DoBatch	Plugin/Freeware	Win	5.5.6, 6.0, 7.0	Cudspan http://www.telecable.es/personales/cud/cssIndex.htm	<p>Part of Cudspan Tools. Runs batch processing in documents and books. Save as MIF, Filtered, ViewOnly, or document; Update a book or document; Import formats; Run another plugin on a book or document.</p> <ul style="list-style-type: none"> • Requires the CudLog plugin. • DoBatch can now use your installed export filters to save as other file types. This includes HTML and XML. See the updated docs for more information. (5/23/01) • NEW: DoBatch now saves as PostScript. (9/14/01)
DualFlows	Plugin/Retail— @\$80	Win	6.0, 7.0?	Carmen Publishing http://www.frameexpert.com/plugins/index.htm	<p>The DualFlows plugin automatically maintains correct pagination in multiple flow documents. For example, when a Student page is added, a matching Instructor page is automatically added and linked to the previous Instructor page.</p> <p>NOTE: Currently available in beta only (10/26/2002)</p>

Table 1 Windows Utilities for FrameMaker (Sheet 5 of 16)

Name	Type/Cost	OS	FM Version	Source	Description
emDEX	Plugin/Retail– \$100/1 license up to \$7,500/unlimited	Win	5.5, 5.5.6, 6.0, 7.0	emDEX http://www.emdex.ca	<p>A real-time visual means of watching your index grow right before your eyes to help you track and modify your index entries on the fly. Features:</p> <ul style="list-style-type: none"> • real-time visual updating of the emDEX index window AS YOU ARE MARKING ENTRIES, allowing you to view and modify entries as you go • real-time formatting of locators and "See", "See also" references • visual index creation for single documents or books • global search and replace • one-step range marking by highlighting text <p>NOTE: Demo version available. Full capabilities but limited to 100 entries.</p>

Table 1 Windows Utilities for FrameMaker (Sheet 6 of 16)

Name	Type/Cost	OS	FM Version	Source	Description
Enhance	Plugin/Retail—\$99.99	Win9x NT, 2K, XP	5.5, 5.5.6, 6.0, 7.0	Sandybrook http://www.sandybrook.com	<p>Creates an outline view (with collapsible topics based on assignable headings) for FM. Similar to the one in Word.</p> <ul style="list-style-type: none"> • Collapse a document so that only its heading paragraphs are displayed, then quickly find and expand just the section you want to work on. • Any edits or changes you make while in Enhance are immediately reflected in the underlying FrameMaker document. • Drag & drop editing • Flexible outline level assignment Assign an outline level to any paragraph format any time in your session—Enhance regenerates the outline view automatically. Enhance now supports multiple formats per outline level. • Change the outline level of paragraphs, or groups of paragraphs in a single operation. • Paragraph sorting —Sort simple lists, or sort entire sections (useful for creating reference manuals). • Format name area—Paragraph format names are optionally displayed to the left of each paragraph. • Multiple document views—Now you can view different parts of a document at the same time. Document views can be displayed either as a pane within the same window or as a separate window. • Template linking—Link documents to template documents, then import formats in either direction with a single operation. • Copy visible text—Collapse your document to its headings, then copy only the visible paragraphs. Very handy for creating lists.

Table 1 Windows Utilities for FrameMaker (Sheet 7 of 16)

Name	Type/Cost	OS	FM Version	Source	Description
EZVars	Plugin/Shareware—\$15/single, \$50/site	Win 9x	6.0, 7.0	ElectroPubs http://www.electropubs.com/downloads.htm	<p>Creates a modeless dialog box listing all defined variables (similar to Character & Paragraph Catalog). It lists all variables in the document and allows you to insert the content of a variable into the document simply by double-clicking on a variable name. Creating variables and modifying variable definitions continues to be done using the standard Variables window. To ensure the lists in the two windows are in sync, EZVars has an Update button that re-reads the lists of variables maintained by FrameMaker and updates the list accordingly. Lets you easily replace text in your FrameMaker documents with a variable. For example, you can search for a product name that might change in the future and replace all occurrences of it with a variable.</p> <p>NOTE: New version 3.01, for FM 6.0 & 7.0 only.</p> <p>NOTE: Used to be freeware. Is now shareware.</p>
FindChangeSpecial	Plugin/Retail—\$20	Win	5.5.6, 6.0, 7.0?	Carmen Publishing http://www.frameexpert.com/plugins/index.htm	<p>FindChangeSpecial allows you to find cross-references, paragraphs, tables, and user variables in books or single documents and change them to another format. You can optionally delete the find format. Find/Change results are written to the Console window.</p>
FM Controls	not available separately from TimeSavers	Win	5.5.6, 6.0, 7.	MicroType http://www.microtype.com/	<ul style="list-style-type: none"> • PDFmarker—enables the use of regular FrameMaker hypertext markers to specify PDF features in your FrameMaker files. • ConvertFMnewlink—makes it easy to use FrameMaker’s newlink marker to create “clean” named destinations used by external applications to access a specific location in the PDF file. • IgnoreDOCINFO, IgnoreDOCVIEW, IgnorePAGE—enable you to suppress specific pdfmark commands issued by FrameMaker, which otherwise gain precedence over your own commands. • ManageArticle—converts each “Flow A” text frame into a separate, single-bead article thread. • UnBloat—removes redundant named destinations written by FrameMaker for each and every paragraph, typically reducing the PDF file size by 15% to 25%, depending on contents and original size

Table 1 Windows Utilities for FrameMaker (Sheet 8 of 16)

Name	Type/Cost	OS	FM Version	Source	Description
FrameMaker/ Windows Express Customization	Free	Win	5.5.6, 6.0, 7.0	MicroType http://www.microtype.com/	Includes: <ul style="list-style-type: none"> • An enhanced formatting bar, with a character format and font drop-down menus; icons for copy attributes (paragraph, character, conditional text settings, column width), repeat operations, insert file, faster navigation. • A Quick Access bar with just two sets of tools (text & table, graphics 1 & 2, instead of four separate sets). • Many useful commands and common special characters easily accessible through function key and Application key combinations. • Context-sensitive right-click menus with additional items: Go Back, Save All, Close All, Pick Up Object Properties commands and more. • New entries in the Help menu – linking to online manuals, templates, sample files and clip art. • Equation palette with buttons pointing to commonly-accessed files (FrameMaker and other formats, such as PDFs). • Quick reference guides: Windows standard shortcuts, escape commands for FrameMaker/Structured FrameMaker, interactive character set browser.
FrameScript	Plugin/Retail http://www.framescript.com/About_FrameScript/Availability_and_Pricing.htm	Win, Mac	5.5.6, 6.0, 7.0	Finite Matters Ltd. http://www.framescript.com	FrameScript has been developed with the FDK to interface with FrameMaker so that script writers can customize FrameMaker with utilities, etc.
Full Conversion Table	Plugin/Helpware	Mac	5.5	Jasper Bache http://www.bache.com/sgml.html	A utility that generates a full conversion table for the active document. FrameMaker+SGML only includes formats that are used in the document. This is not a good strategy if you want to structure a book based on a template. Full Conversion Table include all defined paragraph- and character formats in the conversion table.
Hunt Overrides	Plugin/Freeware	Win	5.5.6, 6.0, 7.0	Cudspan http://www.telecable.es/personales/cud/cssIndex.htm	Part of Cudspan Tools. Lists instances of paragraph format overrides, separating overrides that are only due to page-breaks from other overrides. The list is a hypertext document you can use to navigate to the override instance.

Table 1 Windows Utilities for FrameMaker (Sheet 9 of 16)

Name	Type/Cost	OS	FM Version	Source	Description
ImpGraph	Plugin/Shareware-\$10	Win	5.5.x, 6.0, 7.0	Bruce Foster Plugins http://www.frameexpert.com/plugins/brucefoster/index.htm	Lets you specify the default settings for the anchored frame created when you import a graphic and the runaround settings for an imported graphic. The following anchored frame properties can be set: anchor position, alignment, cropped, floating, and baseline offset.
Import Formatted Tables	Plugin/Freeware	Win 9x	5.5.6	ElectroPubs http://www.electropubs.com/downloads.htm	Use this DLL to import comma-delimited text into preformatted table definitions.
Index Tools	Plugin/Shareware-\$10 per seat, \$100 per site, \$1,000 worldwide Nags until you pay for it	Win, Mac, Solaris	5.5.x, 6.0, 7.0 (no 7.0 for Solaris)	Silicon Prairie http://www.siliconprairiesoftware.com/	Index Tools provides the same tools to format generated indexes that are included in Index Tools Professional.
Index Tools Professional	Plugin/Shareware-\$30 seat, \$300 per site, \$3000 worldwide Nags until you pay for it	Win, Mac, Solaris	5.5.x, 6.0, 7.0 (no 7.0 for Solaris)	Silicon Prairie http://www.siliconprairiesoftware.com/	Index Tools Professional provides improved indexing capabilities for FrameMaker. It allows embedding index entries into the flow of documents, eliminating the need to work with FrameMaker's Marker window. It provides tools to format generated indexes, including adding "continuation" lines for groups of entries that span multiple columns. Index Tools Professional also includes a tool to make generating a master index for a set of FrameMaker books quick and easy. The latest version of Index Tools Professional allows merging and continuation lines to be applied automatically, whenever a generate/update operation is performed on a FrameMaker book.
IndexRef	Plugin/Retail-\$25/user	Win	6.0, 7.0	Sundorne Communications http://www.sundorne.com/IndexRef/indexref.htm	IndexRef finds cross reference entries in an index, determines where the destination link should be, and rewrites the hyperlink so clicking it will jump to the appropriate place in the index. NOTE: Time-limited evaluation version available.
LEP Tools	Plugin/Retail-\$30/single, \$300 for site Nags until you pay for it	Win, Mac	6.0, 7.0	Silicon Prairie http://www.siliconprairiesoftware.com/	LEP Tools is a special-purpose FrameMaker plug-in that helps generate a List of Effective Pages for a set of FrameMaker documents. If you create document sets that require a List of Effective Pages, this plug-in may make that process much easier.

Table 1 Windows Utilities for FrameMaker (Sheet 10 of 16)

Name	Type/Cost	OS	FM Version	Source	Description
Lexicon Manager	Retail	Win, Solaris *		Smart Communications http://www.smartny.com	The SMART Lexicon Manager manages the dictionaries for MAXit and the SMART Translators. This program uses a simple Windows interface to quickly add, delete and change the terminology in seconds. The users must understand English grammar, parts of speech and Controlled English. *Available on Solaris by special order only.
Link Controller	not available separately from TimeSavers	Win	5.5.6, 6.0, 7.0	MicroType http://www.microtype.com/	<ul style="list-style-type: none"> • VisLinks—gives you control over highlighting style, border color and width, and different colors for internal and external links generated by FrameMaker. You can also automatically adjust the size of the link area. • ForceNewWindow—automatically displays each externally-linked PDF file in a separate window, overriding the Acrobat Reader local preference of “open cross-document links in the same window”. • ChangeFileNameCase—translates all file names used in FrameMaker links to lower case or to all caps, important in maintaining links when developing interactive PDFs to be viewed in platforms where file names are case-sensitive.
MarkerWorker	Plugin/Freeware	Win	5.5.6, 6, 7	Cudspan http://www.telecable.es/personales/cud/cssIndex.htm	Part of Cudspan Tools. Generates a list to represent all markers of a specified type in a book or document. Once you generate the list, you can modify the marker text and then rebuild all the listed markers with your new marker text. Obvious uses include: <ul style="list-style-type: none"> • Globally editing index markers • Translating marker content • Checking and correcting hypertext markers.
Master Page Tools	Plugin/Shareware—\$10 per seat, \$100 per site, \$1,000 worldwide Nags until you pay for it	Win, Mac, Solaris	5.5.x, 6.0, 7.0 (no 7.0 for Solaris)	Silicon Prairie http://www.siliconprairiesoftware.com/	Master Page Tools helps you easily apply master pages to FrameMaker documents, based on the paragraph tags used in the documents. It also contains a utility to list how master pages have been applied to FrameMaker documents.
MAXit	Retail		5.5, 6.0, 7.0	Smart Communications http://www.smartny.com	Controlled/simplified English. Used to ensure consistency of terminology and grammar to ease translation costs. Users select the text by paragraph, page or document and receive instant text simplification critique. The text analysis is made through the FDK and handles SGML and XML texts during authoring.

Table 1 Windows Utilities for FrameMaker (Sheet 11 of 16)

Name	Type/Cost	OS	FM Version	Source	Description
Mif2Go	Application/Retail– \$295/ first copy; site licenses available http:// www.omsys.com/ dcl/ orders.htm#siteli cense	Win 9x/NT/ ME/2K		Omsys Systems, Inc. http://www.omsys.com/	Automates conversion of MIF files to a number of other outputs, including Word RTF for any version of MS Word, XHTML, XML, MS HTML Help, JavaHelp, OmniHelp, and Oracle Help for Java. The context-sensitive help (CSH) support for MS HH, JH, OH, and OHJ works the same as that used for WinHelp.
MIFBrowser	Application/ Freeware	Win		Graham Wideman http://www.wideman-one.com/ gw/tech/frame maker/ mifbrowse.htm	Provides a tree view of MIF contents.
MIFMuncher	Application/ Freeware	Win		http://www.stc-carolina.org/ sigs/frame/tools/ mifmunch.html	MIF Muncher massages a FrameMaker MIF (Maker Interchange Format) file to extract information. This version extracts stylesheet (paragraph tag) information from the MIF file and generates a tab-delimited ASCII text file that can be pulled into your favorite word processor and easily formatted into a table.
MIFSave	Plugin/Shareware– \$10	Win	5.5.x, 6.0, 7.0	Bruce Foster Plugins http://www.frameexpert.com/ plugins/brucefoster/ index.htm	Batch saves all the files in a book, and the book file, to MIF.
mPose	Plugin/Retail– \$unknown	Win	5.5.6, 6.0	Mekon http://www.mekon.co.uk/ software/plugins.htm	MPose provides FrameMaker with the facility to impose a document into a booklet format.
mTools	Plugin/Retail– \$unknown	Win	5.5.6, 6.0	Mekon http://www.mekon.co.uk/ software/plugins.htm	<ul style="list-style-type: none"> • Remove empty paragraphs • Delete tabs within a text selection • Delete all catalogue formats, table formats, paragraph styles, character styles and conditional text formats • Show used paragraph formats on specific pages • Generate a printable document detailing files contained in a book • Find and replace on multiple lists of words in batch across a directory of files automated indexing.

Table 1 Windows Utilities for FrameMaker (Sheet 12 of 16)

Name	Type/Cost	OS	FM Version	Source	Description
Outline Tools	Plugin/Shareware—\$10 per seat, \$100 per site, \$1,000 worldwide Nags until you pay for it	Win, Mac	5.5.x, 6.0, 7.0 (no 7.0 for Solaris)	Silicon Prairie http://www.siliconprairiesoftware.com/	Outline Tools helps you work with outlines in FrameMaker. This simple plug-in makes outlining in FrameMaker easy, allowing you to move blocks of text with simple keyboard shortcuts.
PageLabeler	Plugin/Retail—\$40	Win	5.5.6, 6.0, 7.0	Carmen Publishing http://www.frameexpert.com/plugins/index.htm	<ul style="list-style-type: none"> • Transfers FM numbering to Acrobat PDF files.
Paragraph Tools	Plugin/Shareware—\$10 per seat, \$100 per site, \$1,000 worldwide Nags until you pay for it	Win, Mac, Solaris	5.5.x, 6.0, 7.0 (no 7.0 for Solaris)	Silicon Prairie http://www.siliconprairiesoftware.com/	Paragraph Tools provides additional capabilities for working with paragraphs in FrameMaker documents. Capabilities include listing paragraph tag usage, removing unused paragraph tags from Frame documents, converting paragraphs to use different tags, and locating and removing paragraph tag overrides.
PDF2Vector	Application/Retail—unknown	Solaris HP-UX	N/A	Square One bv http://www.square1.nl	Converts PDF files to vector format. Windows module expected at some point.
PgfWhopper	Plugin/Freeware	Win	5.5.6, 6.0, 7.0	Cudspan http://www.telecable.es/personales/cud/cssIndex.htm	Part of Cudspan Tools. Lists and deletes unused paragraph formats, character formats, and conditional text tags.
PS2Text	Application/Retail—Win/\$195, UNIX/\$495	Win, UNIX	N/A	Square One bv http://www.square1.nl	Extracts text from Postscript files and converts to formatted ASCII.
PS2Vector	Application/Retail—Win/\$395, UNIX/\$695	Win, UNIX	N/A	Square One bv http://www.square1.nl	Converts Postscript format illustrations to WMF, EMF, MIF, CGM, SVG formats.
RefIcons	Plugin/Freeware	Win	5.5.6, 6.0, 7.0	Cudspan http://www.telecable.es/personales/cud/cssIndex.htm	Part of Cudspan Tools. Inserts icons next to paragraphs. Just design a format/icon pair in your document, then use a single command to save the pair in the RefIcons palette. You can then use the format/icon pair in any document.
Remove Local Formatting	Plugin/Freeware	Win 9x	5.5.6, 6.0	ElectroPubs http://www.electropubs.com/downloads.htm	This DLL removes "local" formatting from FrameMaker documents. Local formatting can be defined as formatting that does not match the definition of the text in the Paragraph Catalog.

Table 1 Windows Utilities for FrameMaker (Sheet 13 of 16)

Name	Type/Cost	OS	FM Version	Source	Description
RTFSave	Plugin/Shareware—\$10	Win	5.5.x, 6.0, 7.0	Bruce Foster Plugins http://www.frameexpert.com/plugins/brucefoster/index.htm	Batch saves all the files in a book, and the book file, to RTF.
RunaroundNone	Plugin/Retail—\$10	Win	5.5.6, 6.0, 7.0?	Carmen Publishing http://www.frameexpert.com/plugins/index.htm	Solves the infamous FrameMaker "Scrollback Bug" . When you scroll forward through a document, Adobe FrameMaker for Windows sometimes jumps to a previous page. RunaroundNone.dll solves the problem for both new and existing graphics.
SnapOff	Plugin/Shareware—\$10	Win	5.5.x, 6.0, 7.0	Bruce Foster Plugins http://www.frameexpert.com/plugins/brucefoster/index.htm	Changes the default setting for graphic snap to off when you open FrameMaker.
TableCleaner	Plugin/Retail—\$60 per seat, \$600 per site	Win	5.5.6, 6.0, 7.0?	Carmen Publishing http://www.frameexpert.com/plugins/index.htm	<ul style="list-style-type: none"> • Straddle multiple rows and columns with one command. • Remove custom ruling and shading from multiple tables. • Resize multiple tables to the text column or text frame width of the table anchor. • Resize multiple tables "by example." Resize a table to your liking and apply the column widths to multiple tables in the document. Choose which columns are resized. • Convert body to heading rows in multiple tables. • Apply paragraph formats to existing table cell paragraphs. Process multiple tables at once.
TableUtils	Plugin/Helpware	Mac	5.5	Jasper Bache http://www.bache.com/sgml.html	A utility that offers some basic math operations on table-cells. You can calculate the sum off selected table cells, add or multiply the cells with a number or round the cells to given number of decimals.
TimeSavers	Plugin/Retail—\$160; volume discount available	Win	5.5.6, 6.0, 7.0	MicroType http://www.microtype.com/	Utilities to enhance conversion from FM to PDF. Includes: <ul style="list-style-type: none"> • Bookmark Controller—see BookMark Controller. • Link Controller—see Link Controller
TocBreaker	Plugin/Freeware	Win	5.5.6, 6.0, 7.0	Cudspan http://www.telecable.es/personales/cud/cssIndex.htm	Part of Cudspan Tools. Remembers page breaks and line breaks in your generated lists. Very useful in the later stages of a project when you have decided on custom breaks in the generated files, but you need to regenerate from time to time.

Table 1 Windows Utilities for FrameMaker (Sheet 14 of 16)

Name	Type/Cost	OS	FM Version	Source	Description
TOOLBOX Basic	Plugin/Free	Win, Mac	5.x, 6.0, 7.0	System Gmbh http://www.systec-gmbh.com/tdsolution/en/loesung/index.html	Paragraph/Character Formats <ul style="list-style-type: none"> • Delete all or unused paragraph, character, cross-reference, variables, and table formats with one click. • Add paragraph & character formats to catalogs.
TOOLBOX Package 1	Retail—\$89/seat, \$269/5 seats	Win, Mac	5.x, 6.0, 7.0	System Gmbh http://www.systec-gmbh.com/tdsolution/en/loesung/index.html	<ul style="list-style-type: none"> • Special Characters—Provides a palette for inserting special characters. Can also create customized palette. • Format List—List of all format settings for document, including page layout, paragraph and character tags, and user-defined variables. • Book Statistics—Count of words, pages, and characters in a book. • Definition Editor—Edit cross-reference formats, variable definitions, and markers; can use non-Latin characters.
TOOLBOX Package 2	Retail—\$129/seat, \$389/5 seats	Win, Mac	5.x, 6.0, 7.0	System Gmbh http://www.systec-gmbh.com/tdsolution/en/loesung/index.html	<ul style="list-style-type: none"> • Book Transfer—Copy book and all referenced files to a new directory structure, including across platforms. Can specify directories to copy files to on an individual basis. Updates external cross-references. • FM <-> MIF—Save an entire book of FM as MIF or MIF files as FM. • Named Destination—Non-modal dialog for entering <i>Jump to Named Destination</i> and <i>Jump to Named Destination and Fit to Page</i> hypertext markers.

Table 1 Windows Utilities for FrameMaker (Sheet 15 of 16)

Name	Type/Cost	OS	FM Version	Source	Description
TOOLBOX Package 3	Retail—\$159/seat, \$479/5 seats	Win, Mac	5.x, 6.0, 7.0	System Gmbh http://www.systec-gmbh.com/tdsolution/en/loesung/index.html	<ul style="list-style-type: none"> • Replace Format Names—Rename specific paragraph, character, and cross-reference formats and tags. • Adapt Imported Graphics—Change specified graphics imported by reference to imported by copy. • Imported Graphic—Export a copied graphic, resize graphic to original size, or scale without distortion. • Left/Right Alignment—Change alignment of paragraphs or tables by tag/format name. • Special Master Page—Applies Master Page depending on paragraph tag on page. • Update Chapter TOC—Seems to be a way to generate a TOC when using a book of books. • Index Markers by Configuration—automatically enter index markers in a document based on a find string and parameters.
TOOLBOX Package 4	Retail—\$199/seat, \$599/5 seats	Win, Mac	5.x, 6.0, 7.0	System Gmbh http://www.systec-gmbh.com/tdsolution/en/loesung/index.html	<ul style="list-style-type: none"> • Server Analysis—determines dependencies in FM files due to references in a folder tree structure and saves information in a data file.
Track Changes	Plugin/Retail—unknown	Win	6, 7	Integrated Technologies, Inc. http://www.intech.com	<p>Monitor, accept or reject revisions within Adobe FrameMaker 6.0/7.0 documents.</p> <ul style="list-style-type: none"> • Changes to text and graphics are monitored on Master, Reference and Body Pages and may be accepted / rejected individually or globally within these pages. • Revisions are clearly identifiable by style and color. These tracking styles and colors may be modified to match individual preferences.
TreePrint	Plugin/Freeware	Win	5.5.6, 6.0, 7.0	Cudspan http://www.telecable.es/personales/cud/cssIndex.htm	<p>Part of Cudspan Tools. Prints the structure tree of a FrameMaker+SGML document.</p> <ul style="list-style-type: none"> • Requires the CudLog plugin.
Various Tools	unknown			Caxton, Inc. http://www.caxton-inc.com	Caxton's web site has not been available for months. Unknown if their tools are still available. Web site/domain name is still owned.

Table 1 Windows Utilities for FrameMaker (Sheet 16 of 16)

Name	Type/Cost	OS	FM Version	Source	Description
WebWorks Publisher	Application/Retail http://www.webworks.com/store/			Quadralay Corporation http://www.webworks.com/	Automates conversion of FrameMaker files to a number of other outputs, including XHTML, XML, HTML, and WinHelp. Has a programming language used to create macros, etc., for customized conversions.
WordCount	Plugin/Freeware	Win	5.5.6, 6.0, 7.0	Cudspan http://www.telecable.es/personales/cud/cssIndex.htm	Part of Cudspan Tools. A wordcount plugin that works with DoBatch. The download includes a sample batch file that shows commands to call this plugin via DoBatch.
XtraAppleEvents	Plugin/Helpware	Mac	5.5	Jasper Bache http://www.bache.com/sgml.html	A utility that enhances AppleScript control over FrameMaker and FrameMaker+SGML.
XtraBookUtils	Plugin/Helpware	Win, Mac, Solaris	5.1, 5.5, 5.5.6	Jasper Bache http://www.bache.com/sgml.html	A utility that lets the user manipulate settings of all the documents in a book. In addition to this XtraBookUtils lets you manipulate external cross references and references to imported graphics. With this utility you can for example turn off all change bars in all the documents in the book with one (small) action, or change all imported graphics to reference a high resolution version.

Table 2 UNIX Scripts for FrameMaker

Name	Type/Cost	OS	FM Version	Source	Description
mifscripts	UNIX scripts/ Freeware	UNIX		Thomas Michanek http://w1.184.telia.com/~u18407300/	The scripts can convert to and from MIF, report usage of formats, remove formats, print out format definitions, compare formats between files, count words, change filename references, and more. All scripts can operate on individual files or on complete book files.
