

**Direct link to an e-mail link
(bypasses the web browsers, but triggers Acrobat's security message)**

- [Recipient](#) only
- Recipient + [default subject, body fields](#)
- Formatted [HTML](#) message

Direct e-mail links launch the default e-mail programs without starting the web browser first; Acrobat's standard security message is displayed (can be suppressed for the duration of the session).

Automatic filtering of special characters; optional e-mail bookmarks; can refer to external text files in markers (to bypass the FrameMaker limit of 255 characters in marker text, or for maintenance purposes).
