

Sample Title

■ “Related PDF” bookmarks

```
alert ~rpdf (Title) /CS [ (title1)
(file1) (title2) (file2) ] /CS
```

- (Title) – Title of “Related PDFs” bookmark
- /CS – Control string for this bookmark (same parameters as in TS shortcuts)
- [(title1) (file1) (title2) (file2)] – A sequence of title/filename for each of the related PDFs (all items are enclosed in parentheses; entire list is enclosed in square brackets)
Filename gets a “.pdf” suffix automatically
- /CS – Control string for all related PDFs bookmarks
