

Web links/bookmarks: web/ftp

FrameMaker Standard Hypertext Markers – Links

message URL hypertext markers:

- message URL `mailto:training@microtype.com` **Example**
can also include default values for fields, such as Subject, CC, Body **Example**
(various punctuation symbols have to be specified as hex values)
- message URL `http://www.adobe.com` **Example**

Hypertext Markers with TimeSavers

Automatic filtering of special characters; web-related bookmarks; can refer to external text files in markers (to bypass the FrameMaker limit of 255 characters in marker text, or for maintenance purposes).

Links

- `alert ~httpLink (www.microtype.com)` **Example**
Web address is automatically prefixed with `http://`
- `alert ~ftpLink (ftp.adobe.com/pub)` **Example**
Web address is automatically prefixed with `ftp://`
- `alert ~NewWinHttpLink (www.adobe.com)` **Example**
Open a new browser window; web address is automatically prefixed with `http://`
- `alert ~NewWinFtpLink (ftp.adobe.com/pub)` **Example**
Open a new browser window; web address is automatically prefixed with `ftp://`

Bookmarks

- `alert ~httpBmk (product updates) /P3 (www.microtype.com)`
- `alert ~NewWinHttpBmk (doc. updates) /P3 (www.microtype.com)`
- `alert ~NewWinFtpBmk (download trial version) /P3 (ftp.adobe.com/pub)`
